1,000+ pull requests merged at Dojo in 10 months

3 restaurants run my POS daily

5 AI agent personas live on web + WhatsApp

8 countries reached by DOJO

SUMMARY

I build AI agents and the products around them, and ship them to production: product, UX, database and access rules, APIs, LLM agents, payments and deploys. Native Spanish, working English, US time zone.

EXPERIENCE

Software Engineer · Dojo Coding Labs · Remote

Dec 2025 - Oct 2026

I built the AI layer of DOJO (trydojo.io), the platform for tech talent in Latin America.

- **Doji AI agent.** OpenClaw plugin with five personas on Gemini 2.5 and 9 tools (pgvector search, read-only SQL with RLS, developer match, project intake, memory), generative UI and guards against PII leaks and prompt injection.
- **WhatsApp agent.** Doji on the WhatsApp Business API: voice notes, guest mode with the catalog, account linking, sign-up from the chat and opt-out.
- **CRM + MCP connector.** Built the company CRM, fed by signed Meta and WhatsApp webhooks, and an MCP server so the ops team runs pipelines and deals from Claude.
- **Projects & Pathways.** Marketplace with Stripe Connect escrow and 11 pgTAP RLS suites, and the learning engine.
- **MenteFut and Hikari.** Lead developer of mentefutbol.com (AI coaching narrated by Jeaustin Campos) and an investor platform with a DECIMAL accrual subledger.

`Gemini 2.5` `OpenClaw` `MCP` `pgvector` `WhatsApp API` `React` `TypeScript` `Supabase` `Stripe`

Freelance Product Engineer · Self-employed · Remote

2022 - Present

- **Restaurant POS + e-invoicing.** Costa Rica electronic invoicing (Hacienda) in 3 restaurants, Sunset Café among them: signed XML, atomic invoice numbers, offline tablets, MCP for Claude.
- **Darlope Travels.** Booking system and CRM for a private-transfer company: bookings from Liberia airport, live driver tracking, leads by channel, ONVO payments.
- **DIESSA OS (in development).** Leading a 3-person team on water telemetry for rural aqueducts: tank level, flow, pressure and water quality on one mobile dashboard.

`React` `React Router` `Next.js` `Supabase` `Hono` `MCP` `OAuth 2.1` `ONVO`

Full-Stack Engineer · Unchained · Contract · Remote

Jan 2024 - Jul 2024

- Built an AI content-generation platform used for Honda and Disney campaign assets: Python pipeline with OpenAI, Claude and DALL·E, plus the creative team's web app.

Full-Stack Developer · QSoft Costa Rica · Contract · Remote

Jan 2023 - Dec 2023

- Android warehouse app in Python: barcode/QR scanning, inbound/outbound control and traceability.

PROJECTS

Rusz Shop
Sneaker store with ONVO checkout and admin.
ruszshop.com

Darlope Travels
Private transfers: bookings, CRM and ONVO.
darlopetravels.com

SWE-201
The course I teach on DOJO Pathways.
trydojo.io/pathways

SKILLS

Languages
TypeScript · JavaScript · Python · SQL

Front end
React · Next.js · React Router · Vite · Tailwind CSS · shadcn/ui

Back end & data
Node.js · Hono · FastAPI · Supabase · Postgres · RLS · Edge Functions · REST · OAuth 2.1

AI
LLM agents · Tool calling · MCP servers · RAG · pgvector · Gemini · OpenAI · Claude · Claude Code

Ship
Stripe · ONVO · Vercel · GitHub Actions · Vitest · Playwright · Linear

Design
Product design · UX/UI · Design systems

EDUCATION

Universidad Cenfotec
Software Engineering coursework
2020 – 2022

Certifications
Anthropic: Claude API · Claude Code in Action · Agent Skills. Google: Data Science · Python · Data Insights. IBM: Software Engineering · Cloud Computing. Udemy: GenAI & LLM Apps · Full-Stack · Python ×2 · CS basics.
