1,000+ pull requests merged at Dojo in 10 months

3 restaurants run my POS daily

5 AI agent personas live on web + WhatsApp

8 countries reached by DOJO

SUMMARY

I build AI agents and the products around them, and I ship them to production: product decisions, UX and UI, database and access rules, APIs, LLM agents, payments and deploys. If it can be automated, I automate it. Native Spanish, working English, US time zone.

EXPERIENCE

Software Engineer · Dojo Coding Labs · Remote

Dec 2025 - Oct 2026

I built the AI layer of DOJO (trydojo.io), the platform for tech talent in Latin America, used in 8 countries.

- **Doji, the AI agent.** OpenClaw gateway plugin with five personas behind a router on Gemini 2.5 Flash and Pro, and 9 tools: semantic search over 4 pgvector domains, read-only SQL with RLS, a 100-point developer match, a 3-phase project intake, Dojo Score and memory. Generative UI: it answers with live components.
- **WhatsApp agent.** Doji on the WhatsApp Business API: voice notes, guest mode with the catalog, account linking, sign-up from the chat and opt-out. The same plugin serves Slack and Discord.
- **Guardrails.** JWT auth and rate limits, PII-leak detection and prompt-injection blocking, an audit log of every tool call and an LLM judge that scores tool output.
- **CRM + MCP connector.** The company CRM, fed by signed Meta and WhatsApp webhooks, run from Claude by the ops team through an OAuth-secured MCP server.
- **Projects & Pathways.** Marketplace with Stripe Connect escrow, dual-signature attestations and 11 pgTAP RLS suites, and the learning engine, where I teach Software Engineering Fundamentals (SWE-201).
- **MenteFut.** Lead developer of mentefutbol.com: AI mental coaching for footballers narrated by Jeaustin Campos, AI-generated audio sessions, PDF kits and Stripe subscriptions.
- **Hikari Intelligence Platform.** Lead developer of an investor platform: KYC state machine, DECIMAL accrual subledger and an audit trail across 7 tables. Scaffold to v1.0-beta in 3 days.

Freelance Product Engineer · Self-employed · Remote

2022 - Present

- **Restaurant POS + e-invoicing.** Costa Rica electronic invoicing (Hacienda), running every day in 3 restaurants, Sunset Café in Playa Marbella among them: signed XML, several issuers on one tablet, atomic invoice numbers in Postgres, offline tablets and an OAuth 2.1 MCP server so owners ask Claude about their sales.
- **Darlope Travels.** Booking system and CRM for a private-transfer company (darlopetravels.com): bookings from Liberia airport, a panel for the owner, office and 5 drivers with live driver tracking, leads by channel and ONVO payments.
- **DIESSA OS.** In development. Leading a 3-person team on water telemetry for rural aqueducts (demo).
- **Rusz Shop.** Sneaker and streetwear store with ONVO checkout and an admin panel (ruszshop.com).

`React` `React Router` `Next.js` `Supabase` `Hono` `MCP` `OAuth 2.1` `ONVO`

Full-Stack Engineer · Unchained · Contract · Remote — Jan 2024 – Jul 2024

- Built an AI content-generation platform used for Honda and Disney campaign assets: Python pipeline with OpenAI, Claude and DALL·E side by side, plus the web app the creative team used every day.

`Python` `React` `Supabase` `OpenAI` `Claude`

Full-Stack Developer · QSoft Costa Rica · Contract · Remote — Jan 2023 – Dec 2023

- Android warehouse app in Python: barcode and QR scanning, inbound and outbound control, traceability.

`Python` `Android` `SQL`

PROJECTS

DOJO · AI layer
Doji, the WhatsApp agent, guardrails and the CRM over MCP.
trydojo.io

MenteFut
AI mental coaching for footballers, with Jeaustin Campos.
mentefutbol.com

Restaurant POS
E-invoicing with Hacienda, 3 restaurants, Sunset Café.
Sunset Café

Darlope Travels
Booking system and CRM for private transfers.
darlopetravels.com

DIESSA OS
Water telemetry for rural aqueducts. In development.
diessa-os.vercel.app

Rusz Shop
Sneaker store with ONVO checkout and admin.
ruszshop.com
