1,000+ pull requests merged at Dojo in 10 months

3 businesses run my POS every day

5 AI agent personas live on web + WhatsApp

8 countries use the DojoOS features I built

SUMMARY

I design and ship AI products end to end: product decisions, UX and UI, database and access rules, APIs, LLM agents, payments and deploys. If it can be automated, I automate it. Native Spanish, working English, US time zone.

EXPERIENCE

Software Engineer · Dojo Coding Labs · Remote — Dec 2025 - Oct 2026

DojoOS: learning platform, freelance marketplace and startup accelerator for tech talent.

- **Doji AI agent.** Built the platform's agent: five domain personas behind a router, semantic search on pgvector, RLS-safe SQL tools, developer matching and project intake. Live on web and on WhatsApp (WhatsApp Business API) with voice notes and account linking.
- **CRM + MCP connector.** Built the company CRM and an MCP connector so the operations team queries and operates live company data from Claude.
- **Projects & Pathways.** Built two core pillars from UX to database: a builder marketplace with Stripe escrow, fund release and disputes, and the learning engine with courses, quizzes and certificates.
- **MenteFut.** Built a paid AI mental-coaching app end to end: diagnostic quiz, AI-narrated audio sessions, PDF kits, Stripe subscriptions and an admin retention dashboard.

`React` `TypeScript` `Next.js` `Supabase` `Gemini` `Stripe` `WhatsApp API` `MCP`

Freelance Product Engineer · Self-employed · Remote — 2022 - Present

- **Fischer POS.** Point of sale used daily by 3 businesses in 3 locations in Costa Rica: orders, kitchen tickets, inventory, cash, payroll and electronic invoicing (Hacienda), plus an OAuth 2.1 MCP server so owners ask Claude about their sales.
- **DIESSA OS.** Leading a 3-person team on a water-telemetry platform for rural aqueducts: tank level, flow, pressure and water quality on one mobile dashboard.

`React` `Next.js` `Supabase` `Node.js` `Hono` `MCP` `OAuth 2.1` `Google Maps`

Full-Stack Engineer · Unchained · Contract · Remote — Jan 2024 - Jul 2024

- Built an AI content-generation platform used for campaign assets for brands including Honda and Disney: Python pipeline running OpenAI and Claude side by side with DALL·E, plus the web app the creative team used daily.

`Python` `React` `Supabase` `OpenAI` `Claude` `DALL·E`

Full-Stack Developer · QSoft Costa Rica · Contract · Remote — Jan 2023 - Dec 2023

- Built an Android warehouse app in Python for barcode/QR scanning, inbound and outbound control and inventory traceability.

`Python` `Android` `SQL`

PROJECTS

Rusz Shop
Sneaker and streetwear store with admin panel.
ruszshop.com

Darlope Travels
Private transfers from LIR with a booking system and CRM.

Box Architects
Real estate with land polygons on Google Maps 3D. Blockchain Jungle 2025.

SKILLS

Languages
TypeScript · JavaScript · Python · SQL

Front end
React · Next.js · Vite · Tailwind CSS · shadcn/ui

Back end & data
Node.js · Hono · FastAPI · Supabase · Postgres · RLS · Edge Functions · REST · OAuth 2.1

AI
LLM agents · Tool calling · MCP servers · RAG · pgvector · Gemini · OpenAI · Claude · Claude Code

Ship
Stripe · Vercel · GitHub Actions · Vitest · Playwright · Linear

Design
Product design · UX/UI · Design systems

EDUCATION

Universidad Cenfotec
Software Engineering coursework
2020 – 2022

Certifications
Anthropic: Building with the Claude API · Claude Code in Action
